

# Night Vision Goggle Support

---

BAE Systems Product Support Group based in Holden Hill, South Australia, undertakes all aspects of the electro-optic equipment life cycle from design and manufacture through to maintenance, repair and overhaul for:

- Electro-optic and opto-mechanical assemblies
- Optical assemblies
- Laser and thermal imaging equipment

BAE Systems' facility is capable of handling prototype/single lots through to full production quantities within a fully ISO-9001 certified quality system.

Our current customers include the aerospace and defence industries, security, police and emergency services, electro-optic system companies, medical equipment manufacturers and research institutes.

#### **Night Vision Test Facility**

As part of our ongoing commitment to support products throughout their life cycle, BAE Systems has developed the infrastructure and know-how to assemble and test a wide range of instrument grade precision optical assemblies and equipment.

Under a licence agreement with ITT Night Vision, BAE Systems has developed an Australian capability to support Night Vision Goggles.

Support tasks include:

- Inspection and validation
- Maintenance and testing capability
- Service and repair
- NVIS demonstration and training facilities

and are performed with Original Equipment Manufacturer accredited personnel, training, test equipment and parts.

BAE Systems understands the importance of maintaining these vital assets at the peak of their performance. Its dedicated facility, specialised test equipment, know-how and procedures in Australia ensure Night Vision Goggle capability has maximum availability for the mission it was acquired to perform.
