

# Improved Gunner Shield With Integrated Transparent Armor (I-GS)

# Improved Gunner Shield With Integrated Transparent Armor (I-GS)

The Improved Gunner Shield with Integrated Transparent Armor (I-GS) combines the increased protection of a taller and wider gunner shield with enhanced visibility of the gunner's sector of fire through the use of transparent armor. I-GS utilizes existing interface points, making it easily retrofittable in the field. It accommodates a larger range of weapon barrels and scope sizes than the standard gunner shield.

- Defeats armor-piercing ammunition and fragmentation threats
- Increases situational awareness for the gunner
- Designed using 3-D sight- and shot-line analyses
- Retrofittable on any Up-Armored HMMWV (UAH) with turret
- Uses existing weapon mount holes
- Proven durability through shaker table testing
- Night vision compatible
- Rock strike resistant transparent armor
- Provides more coverage than standard Gunner Shield
- Maintains C-130 transportability

## KEY FEATURES

Keeps gunner protected while in weapon engagement posture

Retrofits to Up-Armored HMMWV fleet

Functions with M-2, M-240, M-249, and MK-19 weapons
