

Managed application services

[Enterprise-grade mail, collaboration and connectivity]

BAE Systems offers a complete portfolio of secure and compliant email communication, collaboration, and infrastructure services.

Connecting your business operations – everywhere

From small businesses to global enterprises, the burden of maintaining business-critical communications infrastructures is becoming overwhelming. Due to rising costs, greater complexity and proliferating compliance requirements, companies are shifting these services to the cloud to achieve the expertise, reliability and scalability that they need to become more agile and strategic in running their core business.

BAE Systems Managed Application Services are proven to fulfill the rigorous requirements of growth-minded leaders entrusted with high-value information. We offer world-class email services to companies in industries with the most demanding data security, availability and regulatory requirements - all from a single platform.

Solving today's corporate collaboration challenges

We are dedicated to delivering cloud-based email, collaboration, connectivity, and security solutions that simplify how companies process business communications. BAE Systems Managed Application Services offers the industry's most comprehensive and flexible email and collaboration platform to empower organisations with greater productivity and peace of mind.

Enterprise-grade cloud services that are engineered with security built in.

- **Exchange:** provides a secure email and collaboration platform for accessing email, calendars and contacts from any location with desktop and mobile devices.
- **Lync:** provides real-time communications capabilities for more predictable costs, improved productivity and improved business outcomes.
- **SharePoint:** enhances collaboration, provides content management, implements business processes, and supplies easy access to information.

BAE Systems technology and carrier-grade infrastructure

The BAE Systems cloud platform is comprised of carrier-grade infrastructure and built to meet the mission critical needs of the most demanding global enterprises. Our cloud platform is the only solution to bring together SaaS suites for both email and network protection and fully complement them with industry-leading managed services.

Manned by an extensive team of certified security experts providing 24/7 monitoring, alerting and reporting, our security operations centers (SOCs) serve as the foundation for delivering and securing our managed services.

BAE Systems facilities and processes undergo continuous quality assessments, with rigorous third party attestations including annual AICPA SOC 2 Type 2 and Verizon Cybertrust security audits. Moreover, BAE Systems is the only major cloud messaging provider examined by the FFIEC, which requires us to operate within the same stringent security guidelines as banks. As a result, you gain superior cloud services through all these certifications.

By leveraging our secure cloud, companies can reduce cost, complexity and risk through BAE Systems' unique combination of high touch service, best-of-breed technology and unmatched security expertise.

Solution	Key Benefits
Hosted Exchange	<ul style="list-style-type: none"> - Easily manage email, calendars, contacts, and tasks with the familiar Microsoft Outlook client for Mac or PC as well as Outlook Web App (OWA) access - Access email anywhere, anytime on all popular mobile devices including Android, BlackBerry, iPhone/iPad, and Windows Mobile - Strengthen team collaboration through shared calendars and realtime status/presence scheduling capabilities - Best of breed, multi-engine email security and virus protection - Gold Certified Partner with Microsoft Competencies in Hosting solutions and member of TAP - "Top Player" in The Radicati Group Hosted Exchange Market report for 8 consecutive years - 99.999% global infrastructure uptime guarantee - Integrate hosted Exchange with other BAE Systems services such as Lync and SharePoint
