

Exchange 2013

Enterprise-grade secure email messaging

All of BAE Systems' hosted Exchange offerings have robust security features, and comply with federal and industry rules and regulations.

Exchange 2013 by BAE Systems

We Lower Your Risks in the Cloud

- BAE Systems provides a secure email and collaboration platform for accessing email, calendars and contacts from any location with desktop and mobile devices.
- 24/7/365 live monitoring and alerting from a team of certified security experts.
- Proven, robust Fortune 100-grade infrastructure that scales easily and rapidly.
- Mailbox sizes of 25GB or larger

We Reduce Complexity and Costs

- Move costly in-house IT away from a capital expenditure to an operational expenditure.
- BAE Systems provides a lower and more predictable operating expense based on elastic usage.
- Eases compliance burden with SEC, FINRA, HIPAA, SOX, FERPA and FRCP requirements.

We Elevate Your Workforce

- Focus internal IT on strategic, revenue generating projects.
- Achieve greater reliability, security and performance for all users to boost productivity.
- Gain from BAE System' superior high-touch customer service and support expertise for all your security and messaging needs.

Reduce the cost of internal IT infrastructure

From small businesses to global enterprises, the burden of maintaining business-critical communications infrastructures is becoming overwhelming. Due to rising costs, greater complexity and proliferating compliance requirements, companies are shifting these services to the cloud to achieve the expertise, reliability and scalability that they need to become more agile and strategic in running their core business.

Managed Application Services from BAE Systems are proven to fulfill the rigorous requirements of growth-minded leaders entrusted with high-value information. We offer world-class email services to companies in industries with the most demanding data security, availability and regulatory requirements—all from a single platform.

We provide two **market-leading** tiers of Exchange 2013:

Service Tiers	Differentiators
Enterprise Exchange 2013	<ul style="list-style-type: none"> • Designed for large enterprises with a need for the highest level of distributed redundancy and disaster recovery • SLA: 99.999% • Data Center Deployments: 2 • Message Copies per Data Center: 4 / 2 • RPO / RTO: Immediate
Standard Exchange 2013	<ul style="list-style-type: none"> • Highly scalable mid-market offering with attractive economics • SLA: 99.9% • Data Center Deployments: 2 • Message Copies per Data Center: 2 / 2 • RPO / RTO: 2 hours / 45 minutes

Data centers and architecture

All BAE Systems' data centers are built upon a unique pod design concept, making them functionally independent with distinct and redundant resources, and fully integrated with the network architecture.

The BAE Systems' cloud platform is comprised of carrier-grade infrastructure and built to meet the mission critical needs of the most demanding global enterprises. Our cloud platform is the only solution to bring together SaaS suites for both email and network protection and complement them with industry-leading managed services.

Geographic diversity

- With fully-featured Tier 3+ data centers in San Jose, Washington D.C., Europe and Asia P acific, BAE Systems provides geographic diversity to maintain system and data redundancy, and for placing systems in the optimal physical location for traffic volume and speeds.

Best in-class infrastructure

- Our data centers maintain multiple power feeds, fiber links, dedicated generators, and battery backup. They are built from industry-leading hardware and equipment, ensuring the highest level of performance, redundancy, reliability, and interoperability.

Enterprise grade security, compliance and reliability
