

Keeping your assets operational

Global Equipment Management

baesystems.com/warshipsupport

From simple spares to complex upgrades, refits and life extension projects our global resources, skills and experience, allow us to implement the most effective programmes for you. Our extensive international network of approved and assured suppliers, means we're able to offer total, fully integrated and innovative equipment management solutions anytime, anywhere.

We provide technical advice, training and obsolescence management to operators and maintainers of power, propulsion, auxiliary and combat systems, as well as supplying technical publications, drawings and associated documentation.

Our expert workforce of engineers, designers, supply chain professionals and project managers use innovative data analytics and prognostic health management technology to help ensure optimum equipment availability, capability and sustainability through life.

Safe and well-governed delivery methods underpinned by our people, processes, facilities and tools, enable us to provide a reliable, agile and professional service.

Local support.
Global reach.

Trusted by our customers around the world, we have a rich military heritage, thanks to years of working with the UK Royal Navy and their international allies to support their complex assets.

We understand our customers' demands and the need to optimise equipment availability to meet operational requirements. Working with leading suppliers, Original Equipment Manufacturers (OEMs) and small and medium-sized enterprises (SMEs) we are able to provide a collaborative equipment management solution to manage changes in demand and respond to equipment failures swiftly and strategically.
