

RECODE Delivering INTeACT

Our Combat Management System that never stands still

Proven in the line of fire | Backed by 40 years of evolution | Trusted by navies around the world

Future proofing capability through modularity

Adapting software and systems to changing threats and mission profiles.

Quick updates and upgrades keep ships operational and ready.

Embodies the very best in science and technology

Open architecture enables third party and next gen applications.

Sensors, weapons and information sources readily integrated, upgraded or replaced.

Connecting forces

Filtering and fusing data from thousands of data points, across thousands of miles.

Integrated with weapon and decoy systems and uncrewed vehicles.

Speed of relevance

Continuous operator feedback ensures the system evolves with real-world needs.

Minimises late-stage failures and costly surprises.
