

# ACTIVITY EXAMPLE

TO DO:

Build a house to protect the Pigs from the huff and puff of the Big Bad Wolf.

Work in pairs or compete against each other.

TIP: Think about trying different speeds of air. What will help it stay up?

## TAKE CARE:

In all of these activities please make sure you are working safely. Please have fun but supervise your children to make sure your environment is safe and you take care with any craft equipment or materials you are using. Engineers and Scientists always do!
