

RECODE

From contract to combat power

A long-term, value driven partnership with BAE Systems, the Royal Navy and MOD Fleetwide Combat Management Systems

RECODE is a partnership that keeps the Royal Navy mission-ready

How it works

- ✓ Agreeing shared goals and behaviours and solving problems together.
- ✓ Planning as one team, sharing the same data, and continuously improving.
- * Managing each other through rigid clauses.

Why it matters

Faster capability at the speed of relevance → new tech to the fleet sooner.
Higher availability & safety → more ships ready, more of the time.
Better value for money → integrate once, deploy widely.
UK advantage → delivering sovereign innovation and global competitiveness.

Proof we're on track

Operational availability.
Speed of development lifecycle.
Regular feedback loops and open forums.
