

INTeACT Software Development Kit (SDK)

The innovation gateway to the Royal Navy's
combat management system

A safe, modern and straightforward way for partners and third parties to develop and
test new software integrated with the Royal Navy's combat management system.

Unlock and enhance tactical data

Ideal for new decision aids, tactical picture visualisations
and track correlation tools.

Access open, defence standard interfaces to INTeACT.

Add external software to explore the art of the possible.

Innovation at speed

Build and test new ideas flexibly and remotely.

Use tutorials, tools and API documentation to get started quickly.

Shorten and de-risk integration with early validation.

Free access via open defence licensing.

Straightforward to use

Connect easily through open standards.

Internet download of the SDK and supporting software.

Benefit from continual updates aligned to the latest INTeACT capability.

No access needed to the live system.
