BAE SYSTEMS

Welcome to Maritime Solutions Jacksonville

Maritime Solutions Jacksonville (MSJ) is situated two miles from the Atlantic Ocean. The water depth is 41 feet (12.5 meters), providing deep-water access from the Caribbean and Atlantic to the facility with unlimited air draft.

We refit, maintain, modernize, and overhaul mega-yachts, tugs, barges, small cruise and military vessels with the highest degree of expertise, professionalism, confidentiality, and focus on safety. We have the location, capability, and people to service the unique mechanical and engineering needs of your project.
