

# Research reveals Gulf organisations are a soft target for cyber attacks

## BAE Systems research reveals worrying vulnerabilities

A recent study conducted by YouGov on behalf of BAE Systems revealed just how ill prepared most organisations are to protect themselves against aggressive cyber-attacks. Below are more details of our findings:

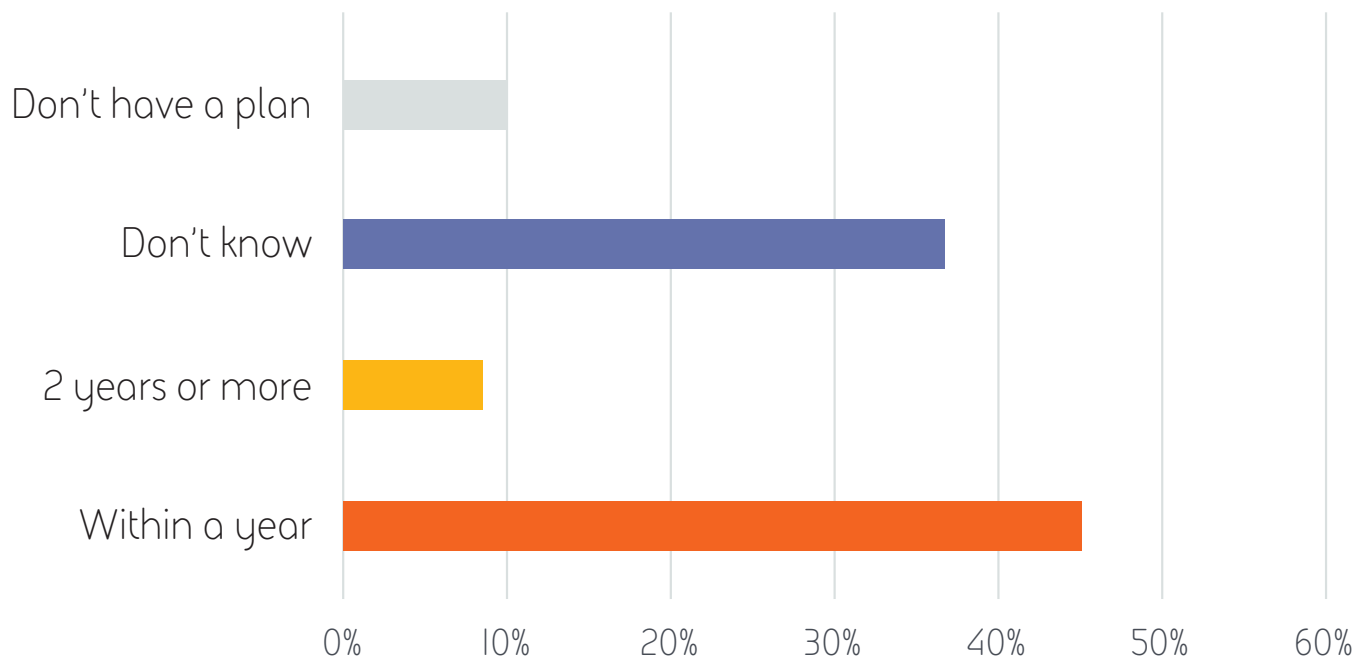

1. Do you think your organisation has appropriate security controls in place to protect it from cyber-attack?

Yes	57%
No or don't know	25%
Don't know	18%

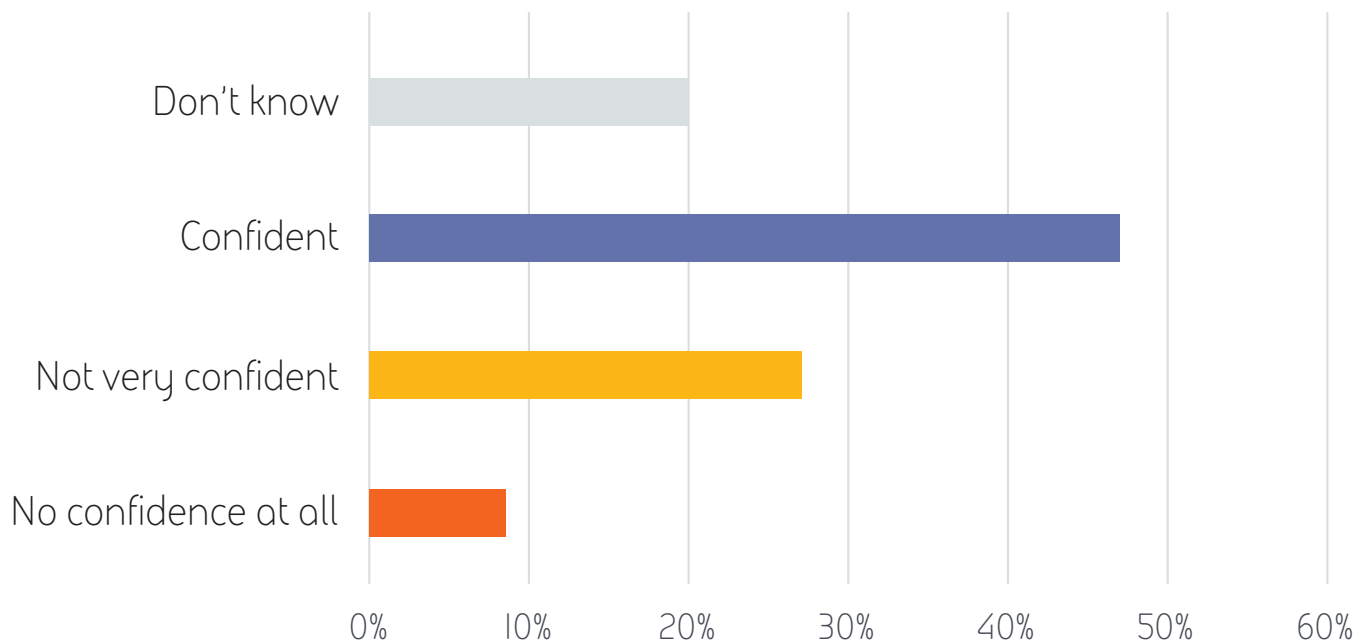

## 2. When was the last time your organisation tested their cyber-attack incident response plan?

Within a year	45%
2 years or more	8%
Don't know	37%
Don't have a plan	10%

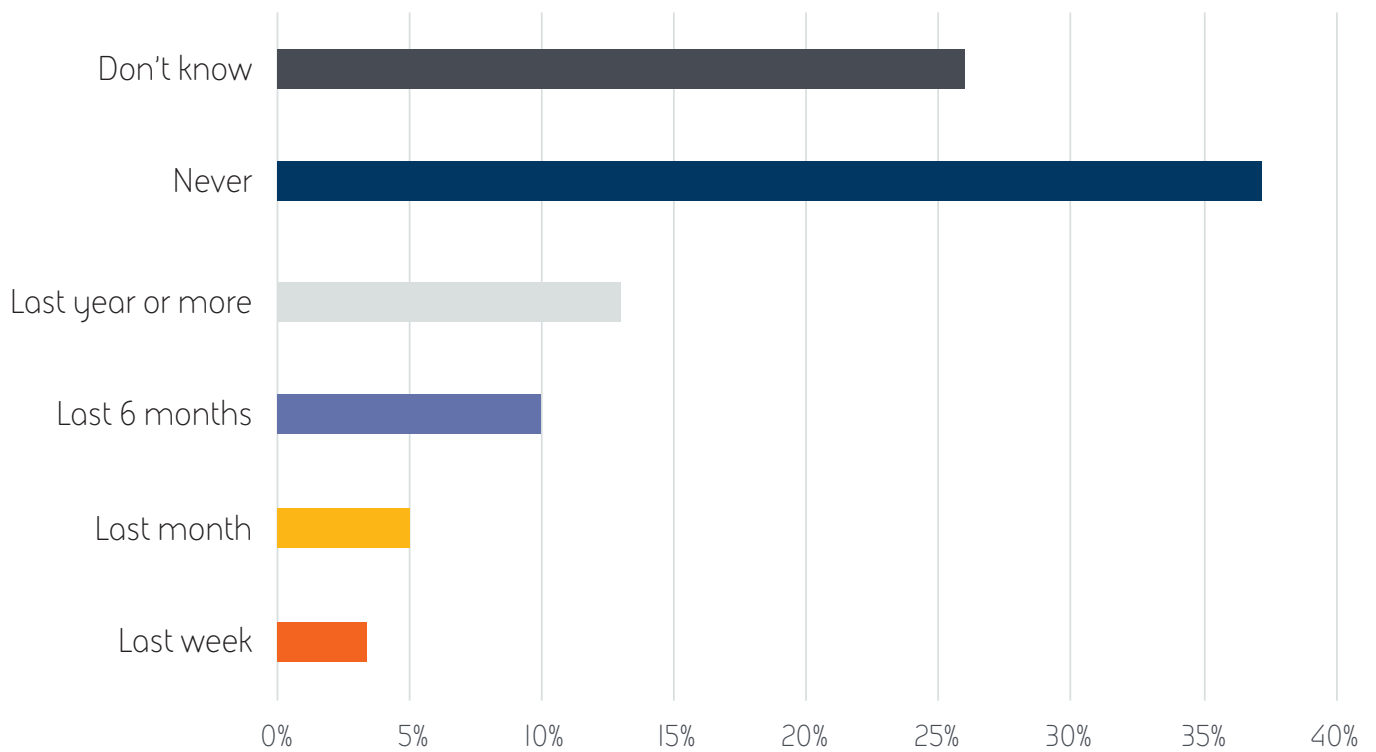

### 3. How confident are you that you could return to business as normal within 48 hours of a successful cyber-attack?

No confidence at all	8%
Not very confident	27%
Confident	45%
Don't know	20%

#### 4. When was the last time your company suffered a cyber-attack?

Last week	3%
Last month	5%
Last 6 months	10%
Last year or more	13%
Never	37%
Don't know	26%

## 5. How much did your most recent cyber-attack cost your business?

Up to AED70,000	24%
Up to AED125,000	14%
Up to AED695,000	11%
Up to AED2,740,000	8%
Don't know	43%
