Full Service Commercial and Yacht Repair Facility

BAE Systems Jacksonville Ship Repair

Strategically located in Northeast Florida, just two nautical miles from the Atlantic Ocean and with deep water access, BAE Systems Jacksonville Ship Repair offers professional ship repair services to commercial and yacht customers.

With a 101-acre state-of-the-art facility, our shipyard includes nearly 1,000 meters of full service piers, more than 12,500 square meters of covered workshops, high capacity cranes and modern production equipment. Our on-site technicians and engineers, established professional relationships with all classification societies and regulatory bodies, and a variety of dry dock options for ships up to 13,500 tons makes our shipyard the leading professional commercial and yacht ship repair facility on the United States East Coast.

Whether your vessel is in need of pier side services, maintenance, fabrication, mobilization, periodical marine surveys, scheduled dockings, emergency dockings, complex repairs, overhaul or refit, BAE Systems Jacksonville Ship Repair is ready to professionally lead your project to completion. Our goal is to provide services on schedule, within budget and without difficulty. From start to finish, we are the shipyard of choice.
