

# Autonomous Collaborative Platform concept

An uncrewed aircraft incorporating goal-based autonomy that is capable of independent or synchronised action with Combat Air. Designed as an attritable system, the Autonomous Collaborative Platform concept offers a pathway to increase affordable combat mass and deliver enhanced operational effects.

Electric Control Systems

Two Internal Payload Bays

Conventional Take Off & Landing

Containerised Storage

Goal Based Autonomy

Rapid Operational Readiness

Modular Construction

## Potential Applications

-  Electronic Attack
-  Precision Air-Surface munitions
-  ISR (EO/IR sensors)
-  Air-Air and Air-Surface stores
-  Land or Maritime variants
