

Global equipment management

We know that managing and maintaining equipment is critical to ensuring that ships are always available whenever and wherever they are needed.

Trusted to deliver to navies around the world, we understand the defence industry and the global needs of our customers.

And we have the resources, skills and experience to advise on and implement the best solutions for you.

From simple spares to complex upgrades and modifications, our global resources and expertise, as well as our extensive network of approved and assured suppliers, means we're able to offer total, fully-integrated and innovative equipment management solutions.

Provision of spares and repairs

Leveraging our strong relationships with an extensive global network of approved suppliers, we can deliver a tailored solution which will provide certified spares, on an asset availability or ad-hoc basis, with direct from factory delivery or free carrier shipping as required.

We work with leading suppliers and original equipment manufacturers to enable swift and smooth procurement of high quality, certified spares, in addition to asset management, logistics and distribution services.

We have the capability and experience to provide the repair, re-provisioning, overhaul and calibration of ship equipment, using both original equipment manufacturers and approved repair providers.

Modifications and upgrades

With a proven track record of delivering complex modifications and upgrades from concept through to installation, our programmes of work are individually tailored to meet our customers' needs. They can cover everything from design, integration, scheduling and planning, to fitting, installation, commissioning, acceptance tests and trials.

Our services include:

- **Design services** - from high level specifications through to detailed installation documentation
- **Modification proposals** - to implement modifications to platforms
- **Requirement scoping** - generating system and equipment level requirements and evaluations, identifying suppliers and engaging manufacturers
- **Platform safety management** - including hazard log management, platform and equipment safety cases, and implementing safe systems of work

Through-life support

We're there for our customers, whenever and wherever in the world they need us, providing engineering and technical through life support to optimise ship performance and maintain operability at all times.

We have the expertise and capability to provide a broad range of support services including configuration management, maintenance plans and schedules, obsolescence management and technical support.

Our services include:

- **The issue of technical instructions** - safety hazards, inspections guidance, minor modifications and how to overcome parts obsolescence
- **Query answering service** - a rapid response to technical questions
- **Publication and drawing amendments** - management and updates of technical guides
- **Obsolescence** - a reactive or pro-active approach to reduce the impact of obsolescence issues.
