

THIS AUSTRALIAN SHIPBUILDER IS **TRAINING**

RIGHT NOW

LO2

BAE Systems is delivering realistic, scalable, innovative and cost effective training for the Australian Defence Force today.

Our proven training teams tailor and integrate live, virtual and constructive tools to provide targeted training outcomes.

We've trained over 700 ADF members serving on the Landing Helicopter Dock Amphibious Assault Ships. Our virtual LHD and Engineering Systems Trainer provides ADF members realistic individual and collective training before they even step on board. With dynamic scenarios that continuously evolve to encourage students to stretch their learning horizons within a safe environment.

It's another way we provide solutions at sea and ashore.
