TRAINING SOLUTIONS

BAE SYSTEMS AUSTRALIA
We know personnel are the most valued resource in Defence and Industry. You require skilled personnel to optimise your systems capabilities. BAE Systems can provide tailored training solutions enabling fast knowledge transfer in order to return more effective personnel to your work place.

Experienced in designing, developing and delivering individual and collective training products across all three ADF services, we offer training to nationally accredited commercial standards. Our proven state-of-the-art training solutions include delivery of training programs in accordance with the Defence Training Model (DTM), or the Systems Approach to Defence Learning (SADL) – Practitioners’ Guide.

Our courses include the integration of Live, Virtual and Constructive (LVC) training systems scaled to meet required learning outcomes and customer budget. Guided by Total Asset Management concepts we aim to instil a proactive rather than reactive culture in students to reduce equipment failures and maintenance costs.

We offer Training Needs and Gaps Analysis capabilities with outputs via reports scaled to suit your training needs. Analysis defines the learning outcomes, enabling options to source or build the most cost effective solution. Our LVC solution matches your training requirement and budget.

We also provide quality assessment services with qualified independent assessors to review pilot courses and course material. Written reports are produced to meet DTM requirements.

Our training experience includes:

- Use of technology to continuously improve training efficiency and delivery
- Smarter more efficient use of emerging products – paperless environments
- Virtual immersive environments
- Computer based learning – enabling distant and blended learning
- Development and implementation of part task trainers
- Proven reduction to course lengths, while concurrently improving student performance
- Configuration control of both course material and course delivery
- Proven ability to design, build and manage training facilities to meet all aspects of training programs, including security requirements.

Continuous improvement philosophy
Proactive response training culture
Leadership and team development
Adaptive student engagement
Immersive shared learning
