

SCENARIO

It's Just Golf

Employee Perspective

CHARACTERS

STEVE
Team member

JACK
Coworker

HEATHER
Coworker

SCENE 1

Steve meets Jack in the hallway.

STEVE: Hey Jack, I've been looking for you. You heard that the team on the GlobalDyne project is coming in next month for acceptance testing and training, right?

JACK: Oh yeah, word has traveled.

STEVE: Turns out our very own program manager, Abdullah, wants us to take them golfing during their visit. Can you help me arrange it?

JACK: Yeah, sure. My brother-in-law's a member of that new private club. I'll help you make the arrangements.

STEVE: Great, thanks. I knew I could count on you to help.

SCENE 2

Jack sees Heather in the break room.

JACK: Hey Heather, didn't you try out that new private course last month?

HEATHER: Yeah, we had a great time. Luckily, I wasn't paying. I'm still searching for the perfect golfing partner. You know, the kind who's always a little worse than you are. Are you going?

JACK: No, but Peter told us to take the team from the GlobalDyne project. They're coming to town for the acceptance testing and training.

HEATHER: Oh, can you do that? I know that with the gifts and hospitality policy, you've got to get the appropriate approvals first. And isn't that team affiliated with their country's government? I'm pretty sure they're not independent.

JACK: I'm just giving Steve help with booking it. He's taking care of the rest. I'm sure he got the appropriate approvals.

SCENE 3

Another day, Steve runs into Jack in the hallway.

STEVE: Hey, thanks for the help on the golfing trip. We had a great time.

JACK: Sure, no problem. Actually, I was surprised to hear it was approved. I thought it was a little expensive to qualify under the gifts and hospitality policy. And with the team's affiliation with their country's government, I thought that might be a problem.

STEVE: What? Why didn't you say something earlier? I didn't even look at the policy. I just did what Abdullah requested.
