

Integrated vehicle protection system

Detect – track – defeat

Sense

The **360 MVP Sensor™** system improves mobility, lethality, and survivability

Response

System automatically alerts crew to threats, reducing cognitive workload

Passive cueing detects ATGM launch at range, alerts crew to origin, cues system components

TERRA RAVEN™ countermeasure system slews to threat origin; Crew or wingman can maneuver to engage or evade threat

ATGM threat inbound

The countermeasure system engages threat

ATGM defeated

Crew continues mission

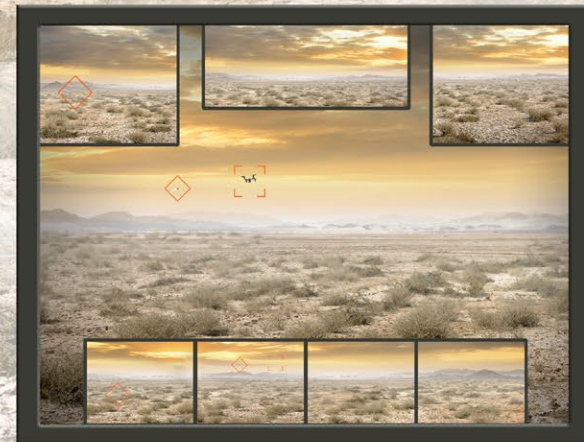

MAPS-compliant, integrated, modular situational awareness and vehicle protection suite tailorable to platform, mission, and operating environment.

Once the threat is detected, the **TERRA RAVEN™ countermeasure system** applies the appropriate non-kinetic countermeasures based on threat confidence, range, and required effect.

ATGM – anti-tank guided missile

BAE SYSTEMS

The **360 MVP Sensor™** system features HD LWIR vision and processing
