

It's not just security.
It's **defence.**

An aerial, high-angle photograph of a city at night, focusing on a complex, multi-level highway interchange. The image is dominated by long-exposure light trails from vehicles, creating vibrant streaks of orange, yellow, and white light that curve and loop through the scene. The surrounding city is illuminated with various colors of light, including blues, greens, and reds, highlighting buildings and streetlights. The overall atmosphere is one of dynamic energy and connectivity.

■ The **connected** world

We deliver business **defence** no one else can match. In fact, we are the **leading** provider of threat **intelligence** to the US and UK governments.

The world in which we live and work is rapidly evolving. As our dependency on technology grows, new opportunities and threats begin to emerge.

Cyber threats no longer just come from mischievous hackers playing games. They come from organised, smart, well-resourced and clandestine criminals and nations, determined to steal intelligence and capital.

Criminals are taking advantage of modern communications and computing capabilities to plan and commit their crimes. The techniques and tools that enable business and law enforcement to detect, prevent and investigate crime – both in the physical and cyber worlds – are evolving rapidly.

And all the time, the way people are using technology in their daily lives is changing, with more data being generated and put out into the public arena than ever before.

The threat is real. The lines have been redrawn. The battlefield is extending to the digital domain.

How will you keep your data, your business and your reputation safe in the new threat landscape?

How will you
keep your data
safe?

We are
BAE Systems

We have been
defending nations
and businesses for
over forty years.

BAE Systems have been defending the largest, most targeted nations and businesses against advanced threats in both the physical and digital world for over forty years.

We operate in four key domains of expertise:

- **Cyber Defence:** Threat analytics, network monitoring, email and web security, investigation, transformation and incident response solutions.
- **Financial Crime:** Identifying, combating and preventing financial threats. Achieving compliance with regulations.
- **Threat and Communications Intelligence:** Next generation intelligence and cyber security solutions for national security and law enforcement; compliance solutions for CSPs.
- **Cloud and Digital:** Using data and cloud to pursue new business models, enhance customer engagement and improve business operations.

Military grade
cyber defence for
your network

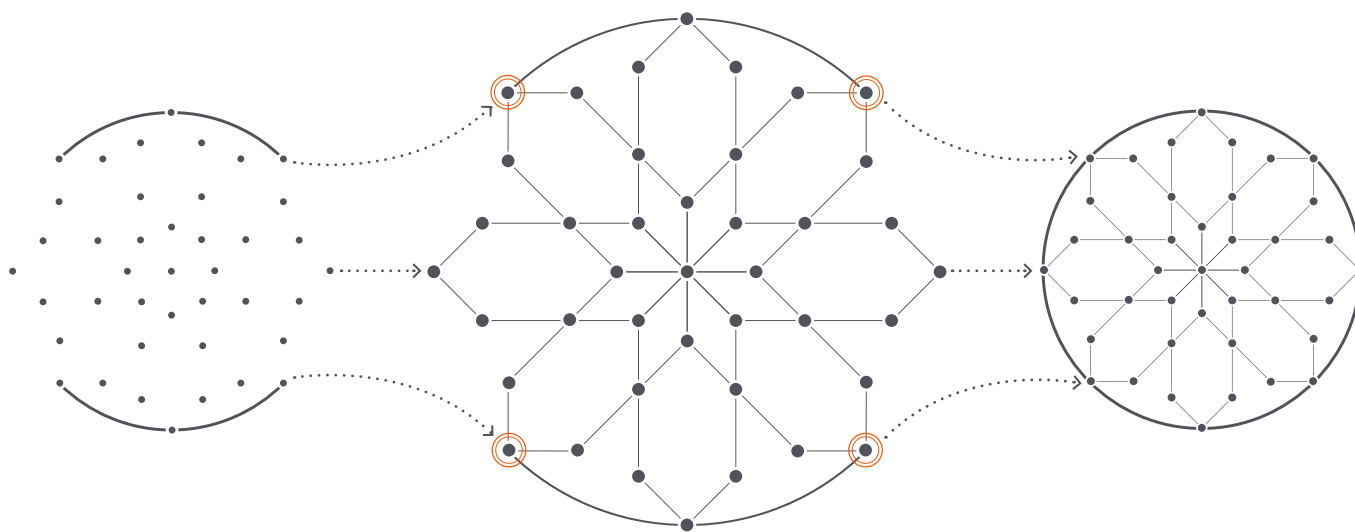

Cyber Defence

Who should you trust to defend you from cyber attacks? A company that provides only part of a solution? Or a company that gives nations, governments and businesses around the world all the tools they need to defend themselves?

BAE Systems apply the same techniques, intelligence and strategy we have honed defending nations. We bring experience at military-class levels to the protection of corporate assets. We call this business defence.

We offer a broad portfolio of on-premise, managed and cloud-based products and services that are battle proven against the world's most dangerous attackers:

- Threat Analytics
- Threat Intelligence Management
- Managed Security Services
- Insider Threat Prevention
- Zero Day Prevention
- Email Security
- Incident Response
- Threat Led Penetration Testing
- Security Strategy and Risk Advisory
- Advanced Security Operation Centers

Monitor

Defend

Financial **Crime**

The threat to financial institutions is persistent and greater than ever before.

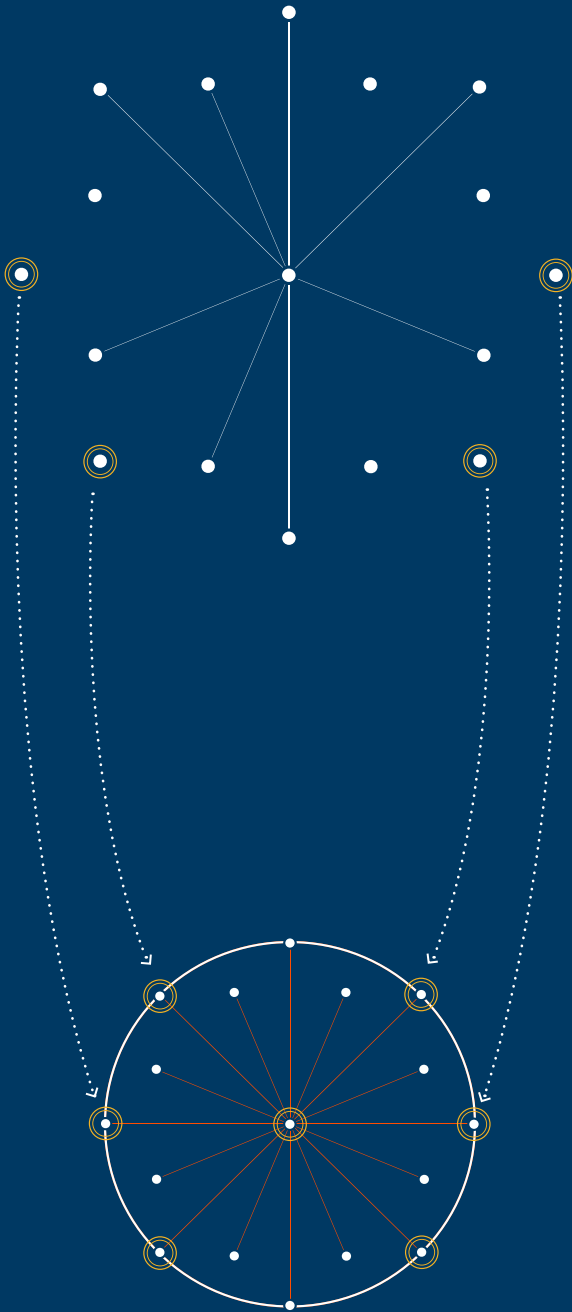

We work with global banks, insurers and governments to provide intelligence and solutions to combat a range of criminal threats in the financial sector. We aim to protect your organisation, your customers and your reputation.

Our range of solutions can help identify, combat and prevent financial threats, as well as reducing risk, loss or penalties and ensuring your institution is fully compliant with regulatory obligations:

- Banking and Capital Markets Fraud
- Insurance Fraud
- Anti-Money Laundering Compliance
- Know Your Customer/Customer Due Diligence
- Unauthorised Trading
- First Party and Application Fraud
- Tax Fraud
- Foreign Account Tax Compliance

 **We defend** over **50%** of all financial transactions in the UK

Detect > Analyse

Monitor > React > Defend

Threat and Communications Intelligence

We provide sophisticated network intelligence, protection and cyber security solutions for law enforcement agencies, governments and communication service providers to ensure the criminals don't stay hidden in the digital world.

Our end-to-end solutions for national security and law enforcement agencies bring together products and service capabilities to help our clients pursue their core missions:

- Data Acquisition, Fusion and Analysis
- Lawful Interception and Data Retention
- Secure Communications
- National Cyber Defence
- Government Cyber Defence
- Tailor-made Electronic Solutions

Intelligence is
at the core of
what we do

Our digital **transformation** solutions are inspired, people-centric, data-driven and connected.

Cloud and Digital

And it's not just the cyber hackers you need to stay one step ahead of.

We can create competitive advantage and enhance operating performance for your business by exploiting data and digital connectivity.

By designing and building engaging user experiences and optimised mobile channels, we can help organisations connect with their customers, employees and partners:

- Service Integration and Management
- Cloud Based Managed Application Services
- Data Analytics
- Digital Advisory
- Digital Creative
- Business Strategy and Transformation

We create
competitive
advantage

Business **defense** for you

BAE Systems is committed to providing intelligent solutions for a wide range of industries in the connected world.

- Commercial Sectors
- Financial Institutions
- Civil Government
- Communication Service Providers
- National Security and Law Enforcement
- Healthcare
- Transport
- Energy and Utilities
