

THIS AUSTRALIAN SHIPBUILDER IS **SUSTAINING** RIGHT NOW

BAE Systems understands Australia's warships. For more than 30 years we have sustained the Royal Australian Navy's front line assets.

Working in partnership with the Navy, we deliver Asset Management, Engineering and Support Services to the Landing Helicopter Docks, ANZAC Class Frigates, Guided Missile Frigates, Collins Class submarines, Mine Hunter Coastal and Hydrographic Survey vessels.

From urgent repairs to deep maintenance, it's another way we provide solutions at sea and ashore.
