

All In Club

The All In Club is a community of people who want to improve gender balance and diversity in our workplace and industry.

Our Vision

To make ourselves obsolete as it becomes business-as-usual for a person to hold and feel they can succeed in any role within Applied Intelligence, regardless of their gender.

Our Objectives

Inspire - Create an atmosphere where people feel they can have the kind of career they want and aspire to success, whatever that means for them, regardless of their gender.

Educate - Ensure everyone understands gender specific problems in the workplace and works in their own way to help overcome them.

Question - Where a policy, practice, system, bias or area is creating a direct or indirect gender barrier, work with the relevant contacts to take action to question and remove the barrier.

Support - Maintain a supportive network with safe spaces to talk about and seek advice on issues. Create networking opportunities to further goals.
