

Defending Critical National Infrastructure for 30 Years

BAE Systems Digital Intelligence provide comprehensive security solutions to mitigate vulnerabilities, ensure resilience, and safeguard your most essential CNI assets.

We provide comprehensive security solutions to mitigate vulnerabilities, ensure resilience, and safeguard your nation's most essential assets.

Tech Infrastructure

We mitigate cyber risks to provide cyber resilience while ensuring compliance

Key Capabilities

Cyber Advisory

Helping you understand and manage your cyber risk

Cyber Security Testing

Assessing the relative strength of your defences

Physical Security

Fortifying against the risk of physical intrusion

Incident Response

Making the right decisions at the right time

Threat Intelligence

Tracking global cyber-attacks and threats

Utilities

We empower organisations to evolve, secure and defend their essential services from today's threats.

Financial Services

We secure banking systems, financial institutions and payment networks against cyber threats to ensure safe and reliable transactions.

Energy

We employ cutting-edge strategies to safeguard critical energy infrastructure to maintain uninterrupted power generation.

Transport

We use advanced technologies to safeguard transportation infrastructure, thereby ensuring smooth operations and passenger safety.
