

Partnerships accelerating mission impact

Mission Advantage™ Technology Partner Program

baesystems.com

Mission Advantage™ by BAE Systems is a technology partner program designed to deliver cutting-edge technologies to accelerate mission readiness. To meet the complex national security challenges our customers face, the program brings together an alliance of strategic technology partners to adapt and respond faster to meet evolving requirements.

Through Mission Advantage, partner companies have the opportunity to collaborate, shape and support our customers' digital modernization objectives to deliver advanced mission engineering, or offer disruptive, dual-use commercial, technologies that impact national security missions. Along with our trusted mission expertise, Mission Advantage facilitates collaboration between BAE Systems and partner companies to drive business growth, scalability, and access to mission critical customer opportunities. Together with our Mission Advantage partners, we're unlocking and creating synergies to bring differentiated, best-in-class solutions to our customers.

Connect. Align. Accelerate. Enable. Execute.

To become a member of Mission Advantage, your company must be aligned with one or more of these focus areas:

- **Enterprise IT:** Dual-use commercial technology companies with solutions or capabilities along the digital transformation spectrum that enable next generation solutions powered by cloud, software, and analytics.
- **Emerging Technology:** Companies with new or adjacent innovation technology with national security applications (i.e., deep tech, seed – series c, startups, etc.).
- **Research and Development:** Companies with defense-centric labs, medium-sized companies with concentrated R&D efforts, or mission engineering focused companies supporting national security.
- **Collaborative Network:** Accelerators, incubators, venture capital firms, academia, Federally Funded Research and Development Centers or other collaborative entities driving technology that foster innovation and modernize the mission.

Partner Benefits

- Drive business growth and technology acceleration through collaboration
- Shape, adapt, mature, and transition small or dual use commercial technology
- Access to mission critical customer opportunities through a central access point
- Mentorship and protégé opportunities
- Federal Acquisition Regulation guidance, technical reach-back, quality control and standards, Intellectual Property, and Department of Defense navigation scalability

Simplified approach to partnering

The Mission Advantage program offers a three-tiered approach to partnering:

- **Strategic Digital Transformation:** For Enterprise IT partners that enable emerging reliable, scalable and secure IT solutions.
- **Mission Engineering & Advanced Technology:** For partners that support solving our customers' complex national security problems through technology development (R&D focused), application, and integration.
- **Disruptive Innovation:** Whether an emerging technology startup or small business, these partners add dual-use commercial technology and rapid prototyping capabilities to create value for new opportunities, product development lifecycles, or existing customer program requirements.

Technologies that are central to the Mission Advantage program and which we are interested in include:

- Advanced Radar
- Artificial Intelligence/Machine Learning (AI/ML)
- Cyber
- C5ISR
- Digital Engineering
- IT/Cloud
- Modeling & Simulation

Stronger together

Our future-focused solutions support, integrate, and accelerate innovation for those who need it most. Our solutions and capabilities include:

- Developing hybrid and secure multi-cloud offerings
- Using model-based approaches for systems and platforms systems engineering and integration
- Designing digital twins to deliver intelligence insights and predictive maintenance
- Implementing cyber resiliency to secure networking operations
- Developing wargaming solutions to visualize and simulate a wide range of operating environments.
