

Success Story: Denying the Use of Fraudulent Parts

- ◆ An AF/ILS advisory alerted Weapon System Programs across the Air Force that the Defense Logistics Agency had procured fraudulent parts. The list of Stock Numbers was executed through the AVCOM Custom Query in the LS Database. AVCOM reported 2,803 instances of those NSNs used in LS-managed equipment that would have been impacted if LS procured

The screenshot displays the 'Electronic Custom Query' window with the following configuration:

- Limit Selection Criteria To:**
 - OEM P/N Flag: ALL
 - Generic: ALL
 - Generic Flag: ALL
 - Generic Pkg Flag: ALL
 - Package: ALL
 - Class: ALL
 - Family: ALL
 - Function: ALL
 - Manufacturer: ALL
 - Mfg Cage: ALL
- Limit Output Display To:**
 - NSN
 - OEM P/N Availability
 - Generic
 - Generic Flag
 - Generic Pkg Flag
 - Package
 - Class
 - Type
 - Family
 - Function
 - Approved Sources
- Show Alternates (Override):**
- Records Per Page (Override):** 1000

The results table contains the following columns: NSN, Description, Manufacturer, MFG P/N, Mfg Cage, Status, and Environment. The first few rows of data are:

NSN	Description	Manufacturer	MFG P/N	Mfg Cage	Status	Environment
