Since the introduction of the first successful military crashworthy crew seat in the UH-60 Black Hawk in 1977, we have earned the reputation as a pioneer in aerospace crash safety and combat survivability.

Building upon our legacy brand, Simula, the BAE Systems team is dedicated to providing innovative, life-saving products to the rotorcraft market.

The S5000 line of crashworthy seats features lightweight designs for crew seating applications. With many available options, the S5000 seats are easily adaptable to any platform.

From military folding troop seats to FAA-certified lightweight crew and passenger seats to Presidential VIP seating, BAE Systems is the provider of choice for the world’s helicopter operators.

KEY FEATURES

- Meets or exceeds FAA requirements
- Meets 14 CFR 29.561 and 29.562 requirements for structural performance
- Meets 14 CFR 29.853 requirements for flammability performance for crew member seats
STANDARD FEATURES

• Seat weight ranges from 21 to 27 lb (10 - 12.2 kg) depending on seat features
• 4-point restraint
• Advanced Kevlar®, carbon fiber composite construction
• Vertical and horizontal adjustment

OPTIONAL FEATURES

• Armrest
• Customized floor interface design and hardware
• Adjustable thigh and lumbar support
• Mission adaptable ballistic protection
• Leather upholstery
• 5-point restraint
• Customized cushions
• Headrest
• Choice of plating and restraint color

1Design efforts may be required.

Kevlar® is a registered trademark of E.I. DuPont de Nemours & Co., Inc.

Test pulse simulating aircraft floor deceleration-time-history.

tr = rise time
V = Impact Velocity
G = Deceleration measured on the test fixture or the sled near the seat position
