

Sharepoint 2013

[Foundation and enterprise editions]

Enhanced business
Collaboration from
BAE Systems' Secure Cloud.

Move to BAE Systems' Secure Cloud

- With SharePoint Server 2013 hosting from BAE Systems, businesses can take collaboration to the next level, with strong security mechanisms, analytics, reporting and robust search capabilities.
- Launching SharePoint is easy with BAE Systems. For a predictable monthly fee, we handle all upgrades, maintenance, security and backups. As your business grows, we provide instant scalability at a known cost to fit your IT budget.

Lower, predictable costs

- Avoid costly and complex IT projects. Focus on revenue generating business and let us manage all hardware, storage, software upgrades and uptime availability.
- Enjoy predictable operational expenses.

Increase productivity

- Improve employee and team productivity. Use SharePoint to engage employees, share ideas, and reinvent the way you work together.
- Realise faster project completions, stay in sync to find answers, discover insights, and connect with experts.

Sharepoint offers transformational company collaboration

Microsoft SharePoint is an indispensable tool for organisations looking to foster collaboration and take control of business content. SharePoint Server 2013 provides a comprehensive solution for connected information work that enables employees to transform the way they work while preserving the benefits of structured corporate policies, processes and compliance.

Complete integration with BAE Systems' secure hosted exchange

BAE Systems' Hosted SharePoint seamlessly integrates with our Hosted Exchange solution – providing users and administrators with complete service integration, including authentication into the SharePoint and Exchange environments.

Feature	Benefits
SharePoint Editions: Foundation and Enterprise	<ul style="list-style-type: none"> • BAE System's SharePoint Foundation runs in our shared environment and offers all of the functionality to start a basic SharePoint instance. Our SharePoint Enterprise edition operates in a dedicated environment and has customisation capabilities. • Integrate either Foundation or Enterprise editions with BAE Systems Exchange 2013 to enable deeper team collaboration and seamless interaction – on a global scale.
Tailored to Your Business	<ul style="list-style-type: none"> • + Start quickly with application templates for addressing specific business processes or tasks. New site publishing features minimise the amount of SharePoint knowledge required to successfully design and brand a SharePoint site.
Sophisticated Security Controls	<ul style="list-style-type: none"> • Set granular permissions at document or item level, and create workspaces and/or tasks within these parameters.
Fully Managed and Hassle-free	<ul style="list-style-type: none"> • Complete monitoring, server management and maintenance 24/7 – with critical daily backups of all SharePoint data

Comparing Sharepoint 2013 foundation and enterprise editions

Feature	Benefits	Standard Edition	Enterprise Edition
Management and Workspace Collaboration	Document collaboration space. Includes version controls, check in/out capabilities, general search, rollback capability and more.	✓	✓
Notifications/Alerts	Email notification on updates based on preferences and group membership.	✓	✓
Calendar Integration and Collaboration Templates	You can overlay calendars or other SharePoint calendars, enabling you to see all your events in a single view. Team Site, Document workspace, Blank site, Blogs, RSS feeds, Wikis and Meeting workspace templates allow you to start up quickly.	✓	✓
Mobile Device Connectivity	Link SharePoint to access task lists, blogs and more with mobile devices.	✓	✓
Retention	Stored in secure data centers with 14 day off site backup via AvePoint.	✓	✓
Site Security	Anti-virus security via TrendMicro, Portal Protect.		✓
Advanced Search	Allows for granular filtering, results tuning, social media search and content previews. Easier access to relevant information makes business more efficient.		✓
Auditing and Reporting	Ability to track users and actions (document edits, policy edits, deletions, etc.).		✓
