Introducing Ironclad

Rubber asymmetric tracks – can climb 45 degree gradients and handle extreme terrains.

Armoured hull – protected against blast and small arms fire.

High endurance battery – up to 50km range.

Autonomy-ready – autonomous system package in development.

Modular configuration – capable of attaching multiple vehicles together for increased load capacity up to 500kg.

Convoy operation – can operate at convoy speeds or be transportable on the back of current military vehicles/trailers.

Universal hardware interface – for individual mission fit systems.
