BAE Systems is responsible for providing aircraft to enable customers to train their aircrew, taking them from students leaving school to professional combat pilots.

**THE AIRCREW TRAINING PIPELINE**

**OPERATIONAL TRAINING**
Having demonstrated all their learning, the trainee pilots now move onto learn how to operate frontline combat aircraft such as Typhoon.

**FAST JET TRAINING HAWK AJT**
Now selected to be a fast jet pilot, the trainee pilots are now taught to understand the complex operations of an aircraft and develop the skills they have already learnt. Through embedded simulation they learn how to operate in combat scenarios.

**PRIMARY FLIGHT TRAINING**
At this stage the students take to the sky for the first time gaining air awareness and experience of handling an aircraft. Basic flying skills and rules of the air are also taught.

**BASIC FLIGHT TRAINING**
At this stage, utilising aircraft, airborne simulation and training devices, the students learn how to further their airmanship skills, plan missions, captian an aircraft and understand the principles of air-to-air and air-to-ground roles.

**ACADEMIC & MILITARY TRAINING**
4 YEAR PERIOD

Having completed their basic training, trainees are selected for further training on a specific type of fast jet trainer.
